SUBJECT: Changes to Non-Filter Blood-Pack Units

Dear Valued Fresenius Kabi Customer,

This is to notify you that we have implemented three changes to our non-filter Blood-Pack units (BPUs).

We have transitioned branding from Fenwal to Fresenius Kabi on all our Blood-Pack Units, included our retractable needle (RTN) with integrated needle guard, and included the centrifugation cup loading instructions with pictures in the Instructions for Use on our double, triple, and quadruple BPU configurations.

The changes listed above affect the following BPU product codes.

Code	BPU Type	Anticoagulant	Configuration	Volume
4R0012MC	Non-Filter	CPD	Single Configuration	450 mL
4R0837MC	Non-Filter	CPD	Single Configuration	250 mL
4R3611	Non-Filter	CPDA-1	Single Configuration	450 mL
4R3622	Non-Filter	CPDA-1	Double Configuration	450 mL

Please refer to the following video link on How to Use the Retractable Needle (RTN) for Blood-Pack Units.

<https://vimeo.com/273905559/74b92c3b26>

Refer to the Instructions for Use for a complete list of warnings and precautions associated with these products.

Please distribute this important information to others in your organization as necessary. If you have any questions or would like additional information, please contact your Fresenius Kabi representatives.

Sincerely,

Yvan Rousseau
