

August 18, 2023

**Dipyridamole Injection, USP 5 mg/mL SD Vial 10 mL**  
**Availability Notice**

Dear Valued Customer,

Fresenius Kabi Canada is pleased to advise that our **Dipyridamole Injection, USP 5 mg/mL SD Vial 10 mL** will be available at all distribution centres by **August 23, 2023**. Once available, this product will be placed on allocation.

Due to the timing of when replenishment inventory will arrive and the criticality of this medication, allocations will be made available on a **weekly basis** and are built using **100% historical monthly demand (e.g., 4 packs of historical monthly demand = an allocation of 1 pack per week)**. Please note that any unused allocations **will not be carried forward** from week to week. Allocations in place include limited coverage of **Glenwood customers' (Persantine) demand** and limited inventory may be available to customers who do not have an allocation.

We are working diligently to ensure equitable distribution of the limited product we have available at this time and appreciate your patience and understanding during this supply challenge.
