

# Fold your own paper crane

Step-by-step  
guide

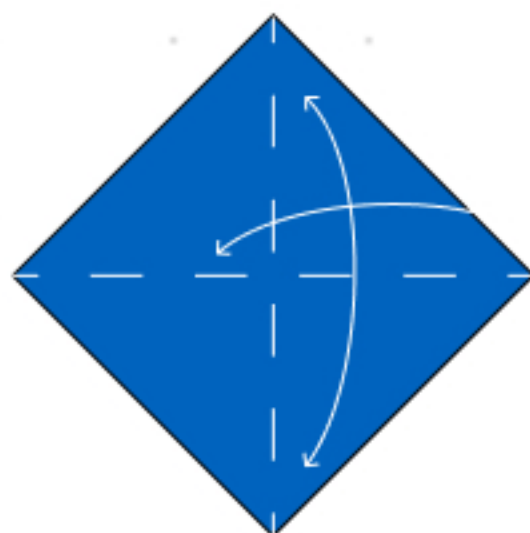

**FRESENIUS  
KABI**

**1**

**Fold the square sheet diagonally from corner to corner and unfold.**

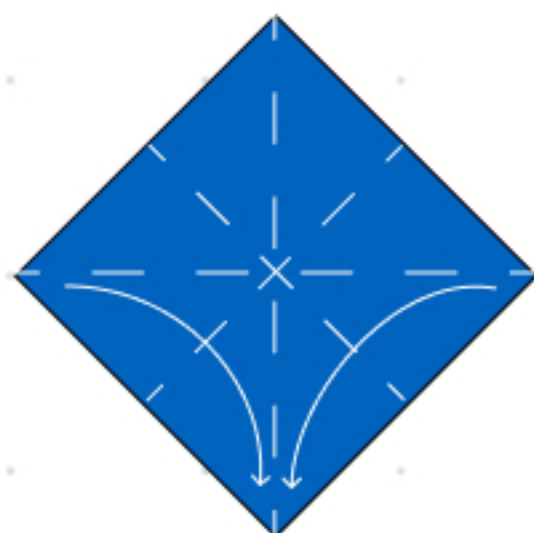

**2**

**Fold from edge to edge and unfold.**

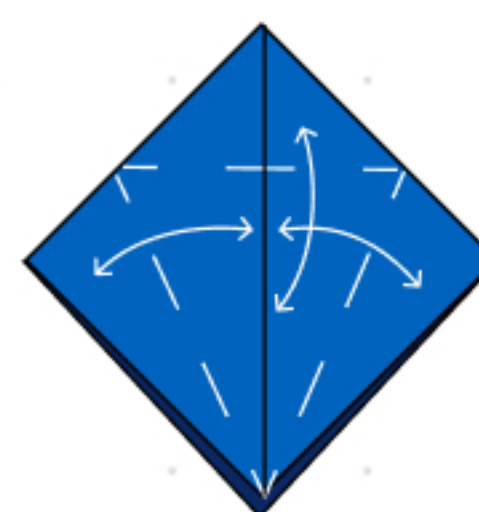

**3**

**Pull the outer corners upward and fold them down to the bottom corner.**

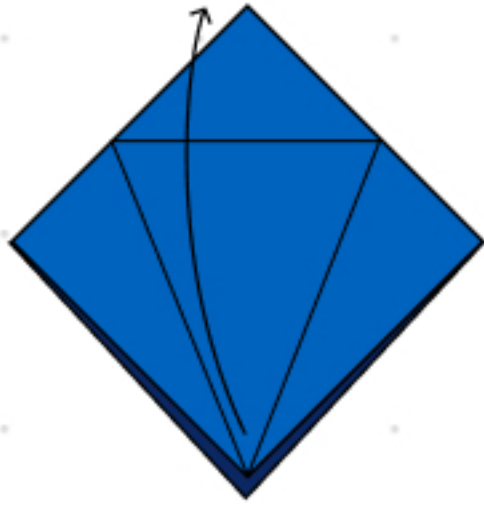

**4**

**Fold and unfold the outer and top corners.**

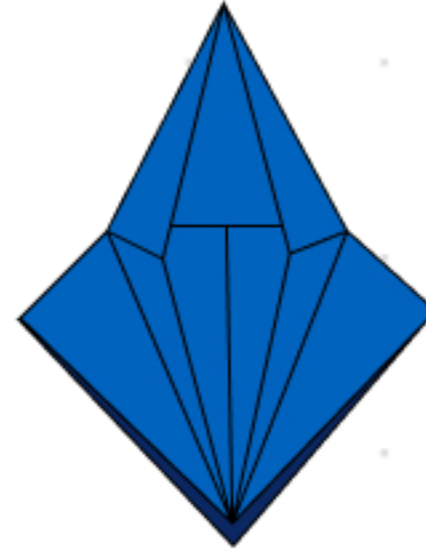

**5**

**Fold the top layer from the bottom corner upward.**

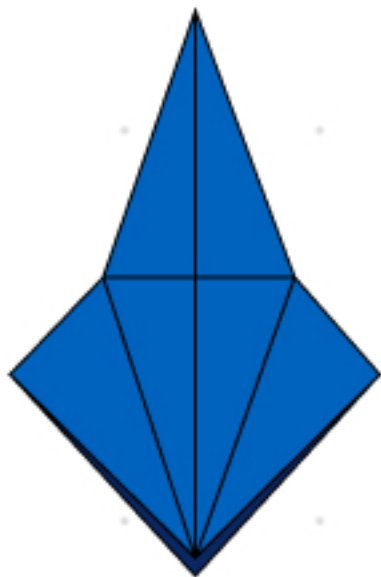

**6**

**While doing so, fold the outer corners...**

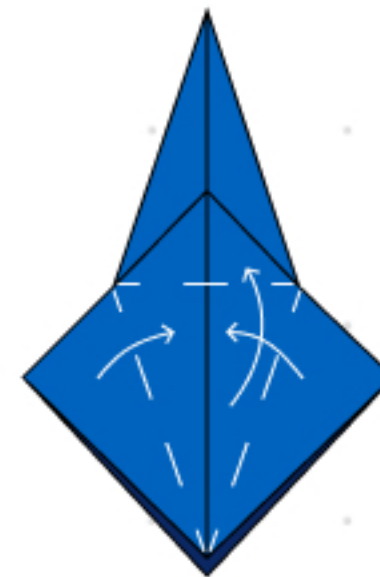

**7**

**..toward the center. Then turn the paper over.**

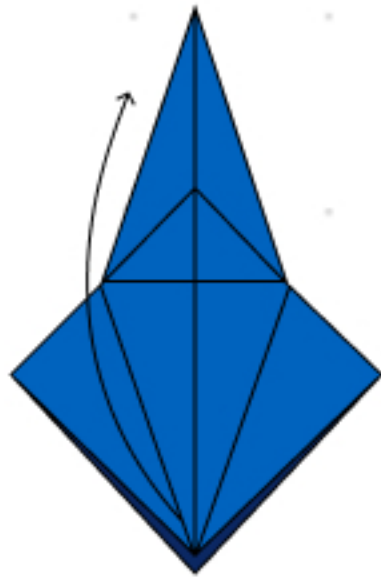

**8**

**Again, fold and unfold the outer and top corners.**

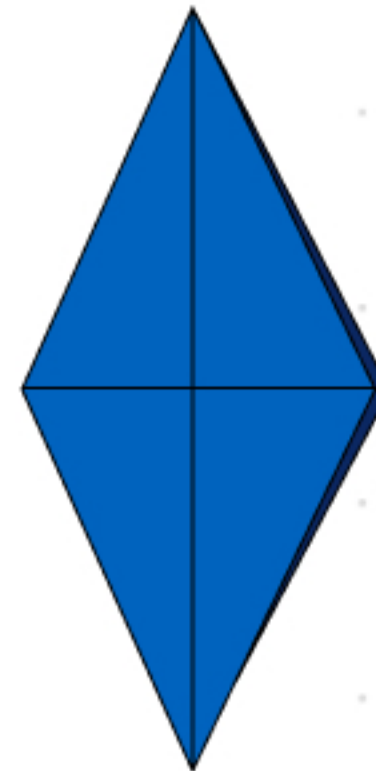

**9**

**Fold the top layer from the bottom corner upward here as well.**

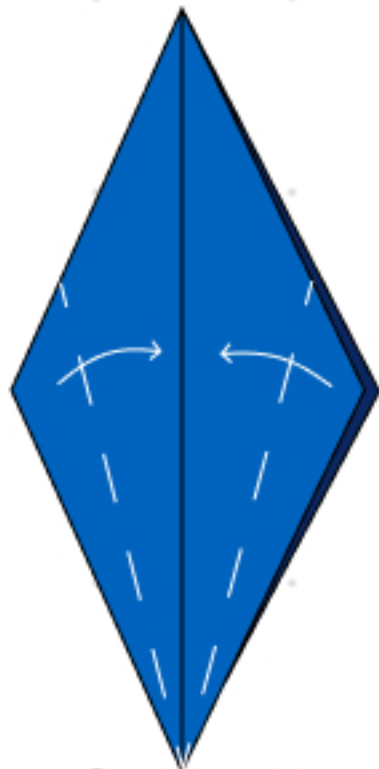

**10**

**Fold the outer corners toward the center.**

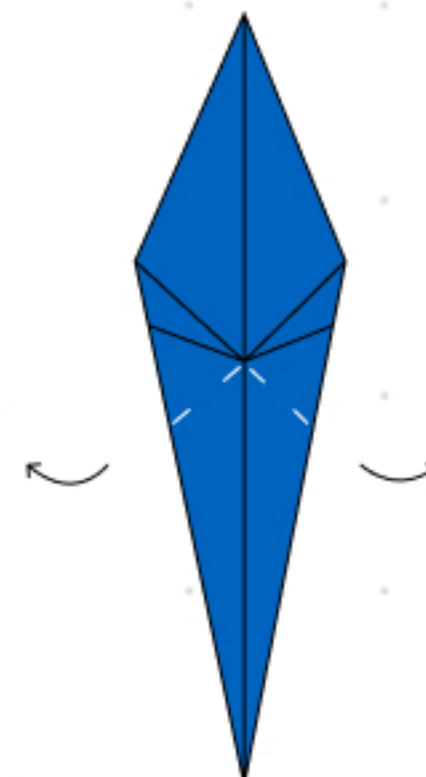

**11**

**Fold the outer corners of the top layer toward the center (front and back).**

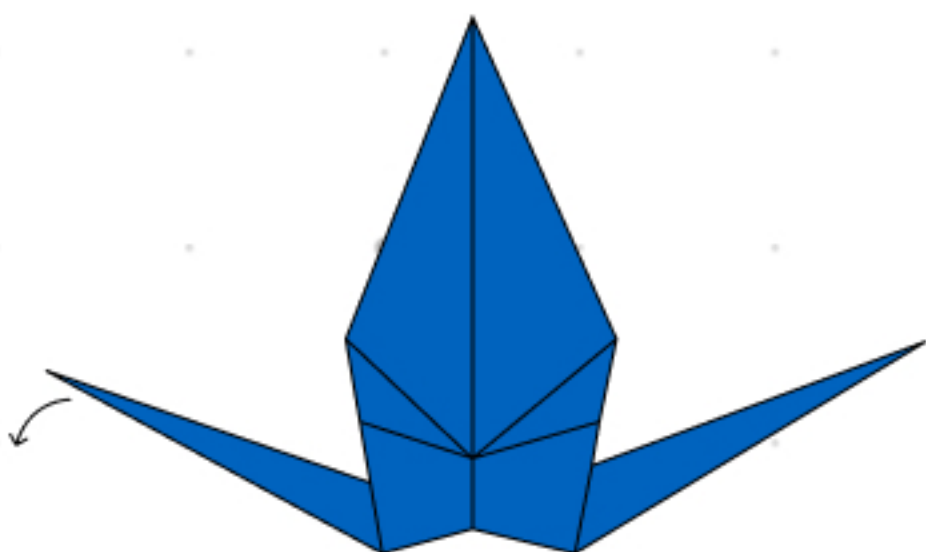

**12**

**For the neck and tail, fold the two strips upward at an angle.**

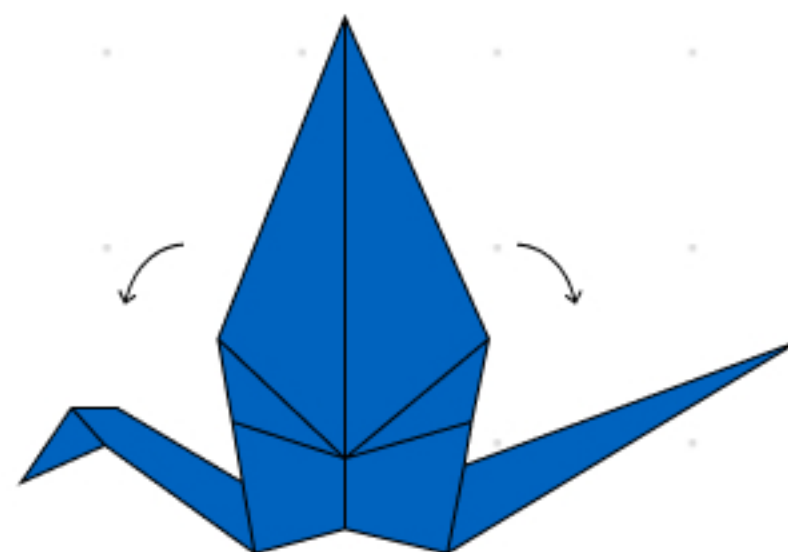

**13**

**Bend the head downward.**

**14**

**Pull the wings down and shape the crane a bit.**

**15**

**The crane is ready to fly!**
