

January 13, 2025

Dear valued customer,

We are writing to inform you of an important update regarding the revalidation and re-upload of Fresenius Kabi's +RFID product data to the Bluesight Registry.

Bluesight and Fresenius Kabi have collaborated on a technical plan to ensure that Fresenius Kabi +RFID product data are accurate and fully present in the Bluesight Registry. This plan includes a data exchange process adjustment, which is being implemented for newly manufactured lots of Diprovan 20 mL +RFID inventory. As a result of the new process, you will no longer receive a warning message in KitCheck when scanning newly manufactured Diprovan 20 mL +RFID vials.

- **Direct Shipments of Diprovan 20 mL +RFID Vials:** Fresenius Kabi will temporarily begin direct shipments of Diprovan 20 mL +RFID vials to customers. This will allow the newly manufactured inventory to be separated from any existing stock.
- **Newly Manufactured Lot Numbers:** To ensure you are using the newly manufactured lots of Diprovan 20 mL +RFID vials, which are registered in the Bluesight Registry, please note the following lot numbers: 10TF7576, 10TH8787, and 10TH8789.
- **Using Existing Inventory:** For any existing Diprovan 20 mL +RFID vials in your facility, you may continue to use the product according to KitCheck's instructions. This includes accepting the KitCheck scan as "incomplete," manually tagging the product, or using the product in non-RFID enabled care settings.
- **Resumption of Wholesaler Shipments:** Once the prior inventory of Diprovan 20 mL +RFID vials has been cleared from the wholesaler channel, Fresenius Kabi will resume normal shipments through wholesalers. You will be notified when these shipments resume.
- **Customer Support:** If you have any questions or need assistance, please contact your local Fresenius Kabi sales representative, or contact our Customer Service team at (888) 386-1300 or via email at [customerservice.USA@fresenius-kabi.com](mailto:customerservice.USA@fresenius-kabi.com).

We will continue to update you as Fresenius Kabi adds more +RFID products to the Bluesight Registry and introduces new +RFID products in 2025.

Fresenius Kabi wants to reassure you that there are no concerns regarding the quality or safety of any Fresenius Kabi +RFID products.

Bluesight and Fresenius Kabi remain committed to providing the most efficient pre-tagged RFID experience and are working diligently to ensure a seamless implementation.

Thank you for your continued support!

Sincerely,  
The Bluesight and Fresenius Kabi teams
