Vigilant® Sentinel Your smart infusion status

Vigilant Sentinel provides smart infusion status to effectively organize and prioritize nurse actions at the bedside. Vigilant Sentinel enables to anticipate events thus reducing stress due to infusion pumps and alarm fatigue.

Optimize your workflow Reduce alarm fatigue Manage your time

- Closely follow-up all of your patients from a single place.
- Keep constantly informed about any required action at a bedside.
- Use ward and bedside views according to your needs.
- Have a constant view of the infusion status with different levels of details.
- Anticipate end of infusions and help to prevent therapy interruptions.
- Immediately detect pumps on battery before they start getting discharged.
- Anticipate the preparation of new bags and syringes for a peace of mind.
- Locate easily available pumps.
- Avoid unnecessary visits to isolated patients.

"The touchscreen makes it very easy to operate and delivers very relevant information. The system is very intuitive, and we find the required information very easily and on time. The evolution of the software is very good and well accepted by the user."

Paulina del Rio, Supervisor Nurse UCIA, Hospital Carlos Van Buren.
