ENTERAL NUTRITION PUMP
PICTORIAL REFERENCE GUIDE
Close the pinch clamp on the giving set and then connect to the EasyBag or container.

Open the pump door.

Place the giving set pinch clamp in line with the downward arrow until it “clicks” in place.

Place the giving set tube straight inside the tube guide.

Close the door, push down the lever to lock it firmly in place.

Turn the Amika® pump on – pressing the on/off button.

Press the automatic priming key, and then press the start button.

When priming is complete, press the start button again.

Set the desired flow rate by pressing the +/- keys until the desired volume is reached.

Set the target volume by pressing the +/- keys until the desired volume is reached.

Press the start key to start feeding.

To stop feeding at any point, press the stop key. When feeding has finished or your target volume is reached, press the stop key.

If you need to reset the progress bar after target volume is reached, press the stop key for 2-3 seconds.

To switch off the pump press the on/off button until the countdown is completed.
