Introduction

Maximising your child's oral nutritional intake

At Fresenius Kabi, we produce a range of nutritional supplements for people who are unwell and cannot manage enough normal food to meet their nutritional requirements. Improving the nutrition your child receives can help them deal better with their illness and assist with their recovery.

Our Frebini range of nutritional supplements come in different flavours, and are best served chilled. To help your child get more nourishment from their every day meals, the Frebini Supplements can be used in the following simple and delicious recipes.

All calorie and protein contents are average estimates and may vary depending upon ingredients used.

Allergy Advice: Where possible we have highlighted common allergens present in each recipe. Please take care to ensure recipes are suitable for your child if they have known allergies.
