# DXT Relay

*The Fresenius Kabi Data Management System*

## Designed to Work Where You Do

Accomplish new operational performance levels with DXT Data Management Solutions. DXT Relay is a software program that resides on a server and communicates over a network to Fresenius Kabi devices in your blood center.

### **OPERATIONAL EFFICIENCY REPORTS**

- . Measure procedural success rate
- . Optimize yield targeting
- . View actual collection times
- . Know events and alarms for every procedure

### **IDENTIFY AREAS FOR IMPROVEMENT**

- . View procedure results by operator, device, and site
- . Track platelet products and split rates
- . Identify targeted vs. actual plasma collection
- . Recognize high performance and coaching needs

**Fresenius Kabi's data management offering provides open and flexible solutions that are designed to improve operational efficiency and documentation capabilities.**

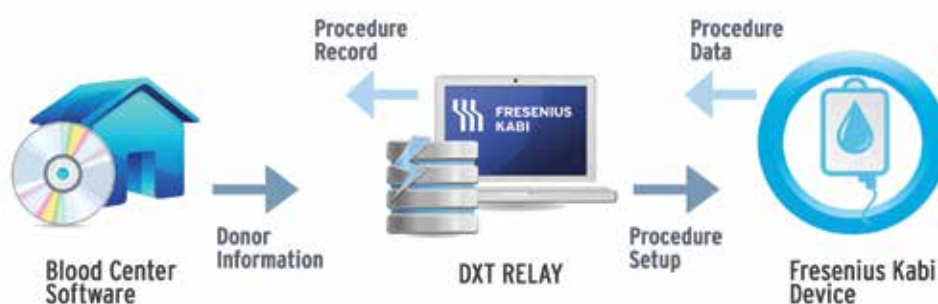

**Access Data Anytime, Anywhere.**

# DXT Documentation Interface

*Advance Your Operations to a New Level of Productivity*

The documentation interface establishes an electronic link between Fresenius Kabi instruments and your blood center software.

## DXT TRANSFERS PROCEDURE DATA TO YOUR DONOR MANAGEMENT SYSTEM

- Donor and procedure parameters
- Collection results
- Event and alarm information

## EFFICIENT SOLUTION DESIGNED FOR IMPROVING OPERATIONS

- Limit the need for manual data entry
- Transfer of data at mobile/fixed sites
- Enables secure and easily accessible records
- Reduce storage space and costs

***Data Resides on Your Network, Empowering You with Access and Control.***

## RELY ON US...

Fresenius Kabi offers you a variety of training programs that can be tailored to your needs. Fresenius Kabi supports the integration of medical devices with DXT (Data Management Solution) with experienced clinical consultants and service engineers.
